

# LAGOS lake depth

## [1] "28.69% (n=2169) of lakes with limno data in lagosus have max\_depth\_m values."

## [1] "84.62% (n=12403) of lakes with limno data in lagosne have max\_depth\_m values."

## Number of lakes with max/mean depth by state

## What are reasonable cutoffs for depth prediction efforts?

Oliver used  $4 \text{ ha} < \text{max\_depth} < 1000 \text{ ha}$

Proportion max depth availability by lake area class (LAGOSNE and Manual)
